

Blended CME: Advanced Life Support in Obstetrics (ALSO®)

Laura Winzen, M.Ed., Educational Technology Department Manager, AAFP, United States

This session explores the new blended version of the ALSO-Æ program. ALSO is an evidence-based, inter-professional, and multidisciplinary training program that equips the entire maternity care team with skills to effectively manage obstetric emergencies.

For over 25 years, the ALSO program was a two-day lecture and hands-on seminar delivered at over 200 sites per year. Last year, the team at AAFP flipped the classroom to launch a new blended option that moved the lectures and reading online along with new instructional videos, branched case studies, and interactive games. The online portion of the course must be completed and passed in order for the learner to attend the schedule live portion of the course, which has been reduced to one day of hands-on workstations and simulated hands-on group testing scenarios.
